

## 5 things your child car seat retailer SHOULD ask you

- 1 How much does your child weigh? (most car seats are fitted on weight)
- 2 How tall is your child? (the head must be in the correct position for the seat to work best)
- 3 What make and model is your car?
- 4 Will the seat be used in any other vehicles? (it must be compatible for all vehicles it's going to be used in)
- 5 They should then show you how to **FIT, ADJUST** and **USE** the car seat in your vehicle.

\* i-Size car seat suitability is checked by height rather than age or weight

To get the correct advice complete this form and take it with you to a retailer...
